

## EASyCAP Upgrade Notes

The EASyCAP upgrade ZIP file includes two update packages.

- 1) *step-1\_easycap\_version\_patch\_3.04.10.ept1* will update the software version license
- 2) *step-2\_easycap\_encdec\_18.10.05.ept1* will update the EASyCAP software

The EASyCAP software upgrade **requires a license**. You will not be able to upgrade your EASyCAP until you have **installed a valid software version license**. If you need a license, contact Viavi Solutions EAS sales at:

- [Trilithic.Easysupport@viavisolutions.com](mailto:Trilithic.Easysupport@viavisolutions.com)
- 1-855-275-5387 Option 1

The software versioning method has been changed to use the format year.month. If you have a software version license with a value less than 18.10, you will need to:

- 1) Install *step-1\_easycap\_version\_patch\_3.04.10.ept1* to update the software version license
- 2) Install *step-2\_easycap\_encdec\_18.10.05.ept1* to upgrade the EASyCAP software

If you're running a software version **older than V3.00**, you will need to **install the full Linux upgrade (includes EASyCAP V3.04.03) before you can upgrade to the latest version**. This can be found on the Viavi website at:

- <https://www.viavisolutions.com/en-us/software-download/easycap-20-and-30-series>

It's recommended that you enable SSH on one of your network interfaces during software upgrades. SSH can be used to troubleshoot and correct problems in case any errors occur during the upgrade.
